ONSITE WASTEWATER TREATMENT SYSTEM BEDROOM AND FIXTURE UNIT WORKSHEET FOR FIRE REBUILDS

This worksheet shall be used to determine the proposed fixtures and fixture unit count for all planned fire rebuild structures. Floor plans may be required to confirm both pre-fire and proposed conditions. Include this signed, dated, certified worksheet embedded in submitted plan set. The completed worksheet shall be certified by an Architect, Civil Engineer, Environmental Health Specialist, City of Malibu Registered Practitioner, or an "A", "C-42", "C-36" Licensed Contractor.

Other (MPC Table 7-3)		x		=	

TOTAL PROPOSED FIXTURE UNITS

Notes

*The fixture units listed on this form may not reflect the permitted number of fixture units on file with the City. Please consult with City staff to determine the approved number of fixture units for the building(s).

1. In completing this form, a room that is not a core room (living room, family room, kitchen, dining room), which is enclosed and is in proximity to a full bathroom is considered a bedroom or bedroom equivalent.
2. For plumbing fixtures not shown in this table please refer to California Plumbing Code.
3. Include the Water Closet specifications embedded in the submitted plan sets.
4. A water closet shall be computed as 3 drainage fixture units, which requires 1.28 GPF or less per Section 4.303 Indoor Water Use of the Los Angeles County Green Building Standards Code. Removable low-flow tank inserts are not allowed.
