

On March 11, Community Development Director Bundy and Assistant Director Eaton met with 16 local design professionals to share updates on the City’s ongoing fire rebuilding efforts.

During the meeting, staff provided updates on fire rebuild permit progress and reviewed the City’s rebuilding guidance related to permitting following the federal executive order issued on January 27, 2026. The discussion also included updates related to Caltrans coordination, seawall considerations, construction activity along PCH, and the latest geotechnical guidelines. Staff also shared an overview of current rebuild construction progress and upcoming rebuild-related meetings.

The meeting concluded with a productive question-and-answer discussion with participating design professionals.
